Nyamwaya Okowa Remmy

Data Analyst | Engineering & Computer Science Student

Data Analysis · Business Analysis · Automation · Web & Data Portals · Full contact details available on request

LinkedIn: https://www.linkedin.com/in/pumtechs/ GitHub: https://github.com/pumtechs-droid

SKILLS

Programming
Python, SQL, R, JavaScript, HTML, CSS

Data Work
Data cleaning, analysis, visualisation, statistical modelling, reporting

Automation
Python scripting, spreadsheet macros, workflow automation

Tools
Excel, Power BI, Jupyter, Git, Google Sheets

Web & Data Portals
Website building, CMS, online and e-service portals

Business Analysis
Requirements gathering, KPI tracking, insight reporting

ADDITIONAL SKILLS

- Engineering: technical drawing, circuit analysis
- Instrumentation: sensors, calibration, measurement
- Digital media: graphic design, content editing
- Productivity: MS Office, Google Workspace, Notion

LEADERSHIP

- Youth leader, Africa's Young Leaders Association
- Coordinated student and community tech initiatives
- Mentored peers in data tools and digital skills

PERSONAL ATTRIBUTES

- Continuous, self-driven learner
- Collaborative team player
- Disciplined and reliable
- Safety-conscious in technical work

REFEREES

Available on request.

PROFESSIONAL SUMMARY

Multidisciplinary data analyst combining hands-on analytics, automation and web development experience with concurrent studies in engineering and computer science. Experienced in cleaning, analysing and visualising data, building data portals and supporting business decisions with clear, evidence-based insight. Brings an engineer's discipline, a strong learning drive and a safety-first mindset to every team.

EXPERIENCE

Research Consultant – Quantitative Data Analysis

WorldQuant BRAIN · Remote

- Built and backtested 30+ alpha signals using financial datasets.
- Raised simulation accuracy 15% through iterative model refinement.
- Applied statistical reasoning to evaluate signal performance and risk.
- Documented research logic for reproducible, well-structured analysis.

Data & Digital Services Analyst

AYLA E-Service Hub

- Reduced data-entry errors by 25% through structured client records.
- Built spreadsheets and reports to track service requests and outcomes.
- Automated 5+ reporting workflows, saving about 6 hours per week.
- Guided 200+ clients through government and institutional portals.

Data & Programs Volunteer

Africa's Young Leaders Association

- Analysed data on 300+ participants to shape youth initiatives.
- Maintained digital records and assets for association activities.
- Prepared summaries and visual reports for leadership and partners.

Industrial Attachment Trainee

Industrial Attachments · Engineering Placements

- Assisted with instrumentation, measurement and equipment maintenance.
- Cut data recording time 20% with structured operational logs.
- Upheld rigorous workplace safety procedures and quality standards.

PROJECTS

- Web Development: designed and built responsive websites and data portals using HTML, CSS and JavaScript.
- AI Integration: integrated AI tools and APIs into web workflows to automate content and analysis tasks.
- Digital Asset Management: organised, tagged and archived digital media assets for fast retrieval.

EDUCATION

Engineering Degree & Computer Science Studies (concurrent, in progress)

Expected graduation: upon completion of current programs. Coursework: programming, data structures, databases, statistics, circuit analysis, instrumentation and engineering mathematics.
